

## Why Sell Your Metal To Hattons?

# Our Mission To Date:

We are a small but dedicated team of professionals with an extensive background within the precious metals industry. Our aim is simply to allow our customers to receive the most possible for their scrap precious metals. We achieve this aim through our industry knowledge and the contacts we have forged over many years in the trade. Our links with major European Precious Metals refineries mean we can offer the best prices for your metal.

# Why Sell To Hattons ?

## Hatton Garden Based Trade Counter.

Enjoy unrivalled service in the comfort of our Hatton Garden based offices. We can pay via bank transfer or cheque and you can even walk out the door with your cash. We also offer a postal service and you can download the postal selling form on our site. As we are based in Hatton Garden, and with an extensive network of contacts within the jewellery industry, if we are able to offer a price higher than the scrap price for any individual item we will do so. No other large scale precious metal buyer in Hatton Garden offers to pay a price higher than the scrap prices for an individual item.

## Contracts With The Largest Precious Metals Refineries In Europe.

After processing your material, we sell the metal onto our end clients. Typically these buyers are some of the largest precious metals refineries in Europe. Given the large volumes of precious metals we trade on a daily basis, we can negotiate superior rates with these firms.

**That means that we can pass the increased revenue back to our customers in the form of higher buying prices. This is the reason why you will be receiving more for your metal with Hattons Precious Metals Recovery.**

## We Buy All Forms Of Precious Metals Including Dental Scrap

We buy all forms of precious metals including dental scrap wastes and can offer to pay our customers pre-assay. We are able to do so as we use a sophisticated algorithm which calculates the precious metals content in dental scrap and calculates a price based the prevailing market rates for Gold, Platinum and Palladium. You simply need to categorise the dental scrap into 6 main types, from yellow clean to white dirty. The algorithm will then calculate a price based in the precious metals content.

## Our Prices Are For Hallmarked and Non-Hallmarked Scrap.

Many of our competitors only offer marginally competitive prices if the precious metal has been melted into an ingot. We are confident in our buying processes and offer our high prices for hallmarked and non hallmarked items. You can send us hallmarked and unhallmarked items and we will buy these offering the highest prices in the market.

## We Can Offer Prices Above The 'Scrap Price'.

Given our extensive network within the jewellery and precious metals industry, we can offer prices above the 'scrap price' for individual items. For example if an individual item can be sold for more than the scrap price, we will give you a price higher than the scrap price for the item. This includes but not limited too: diamond jewellery, vintage/antique items, charms and bullion.

## We Buy And Sell Bullion

As we sell our scrap precious metals to a number of large precious metals refiners in Europe. We are able to offer competitive prices for bullion bars and coins in all the major precious metals including Gold, Silver, Platinum and Palladium.

# Turnaround Time - Have The Money In Your Account That Day.

We understand that cash flow is the lifeblood of any business. No more so than in the precious metals business. As this is the case we offer a 'same day' service, which means we aim to pay our customers and have the money either cleared in their bank account or cash in their hand the same day.

## Payment Methods

Here at Hattons there are no hidden charges for any forms of payment. We pay the same day via bank transfer via Faster Payments, and can also pay using Cheque or Cash. All of which are free of charge.

## How To Send To Us.

Simply visit our site and print out the postal sale form. Fill in as many details as possible and send your items in the post via Royal Mail Special Delivery. This can be insured for up to £2500.00. If you have more than this amount you can send multiple packs. Alternatively we can arrange G4S to securely deliver your material to us for a fee of £25 pounds from anywhere in the UK. This is insured up to and including £100,000.

# Why Not Put Us To The Test?

We understand that cash flow and getting the absolute maximum for your metal is of absolute importance to the trade. It is for this reason that we offer same day processing and pay the highest prices in the market for hallmarked and non hallmarked scrap.

You can see the prices that we pay on our site:  
**[hattonspreciousmetals.com](http://hattonspreciousmetals.com)**.

These precious metals prices are regularly updated and based on the various 'Fix Prices'.
